Introduces the Newest Technology in Hot Melt Adhesives

Buy from the
Innovator not
the Immitator!

It performs similar to a permanent pressure sensitive hot melt adhesive. It bonds to a variety of materials: metals, concrete, hardie board, plastics, PVC, EPDM rubber, foils and wood.

This formulation needs a minimum of a 200 watt gun to perform correctly:

CCS 220 Hot Melt Gun

220 Watts of Power

Complete with stand, on-off switch and adjustable thermostat.

Use with our CCS HM612 hot melt glue

CCS HM612

Has a medium open and set time. Available in 1/2 by 10" hot melt glue sticks. Adhesive will set in 60 seconds.
