

Disinfectant Application Guide

While every situation is different, Chemical Concepts has assembled this list of “go-to” solutions that will cover the vast majority of common disinfection applications. Paired with our leading, EPA “N-Listed” disinfectants, these solutions can be a key part of your comprehensive disinfection action plan!

Small Applications: Small office spaces • Workstations • Common areas

Trigger Spray Bottle

- Easy to Use
- Inexpensive
- Practical for routine disinfection of surfaces and small areas

Disinfectant Wipes

- Great for touch points
- Buy ready-made wipes or make your own. (Add liquid disinfectant to a bucket of dry towels when ready-made wipes are in short supply)

Pump-up/Lithium-ion Sprayers

- Great for common areas, stairways, hallways, and lobbies
- Misting nozzles allow for high coverage
- Foaming nozzles available for smooth vertical surfaces
- Available in hand held, or backpack systems. Pump-up and lithium-ion options as well

Medium to Large Applications: Public spaces • Large offices • Auditoriums Stadiums • Buses • Locker rooms • Cafeterias

Titan Flexspray

- Professional grade hand-held system
- Fast application
- Adjustable spray pattern
- Great for high volume applications where portability is a must

Titan Impact 410

- Industry leading professional spray system
- Available in single gun and multi-gun configurations
- High production rates with faster and better coverage
- Delivers consistent results, without over-saturation
