

META CRÈME BENEFITS

- Next generation technology = superior penetration and lifespan.
- Retains natural color and finish of the surface.
- Super oil and water repellency for superior stain protection.
- Makes cleaning easier and keeps surfaces looking new for longer.
- Low odor, non-drip cream. Easy, one coat application.
- Breathable – water vapor escapes freely, helping to avoid moisture buildup inside the stone.
- Use indoors or outdoors.
- Treated surfaces are food contact safe.
- 15 YEAR PERFORMANCE WARRANTY available when product is applied by a Dry-Treat Accredited Applicator.

SUITABLE SURFACES

Ideal for indoor / outdoor use on kitchens, bathrooms, entertainment areas, patios, pool surrounds, public & commercial areas, floors, walls and counter tops.

NEXT GENERATION IMPREGNATING SEALER

THE ULTIMATE PROTECTION FOR NATURAL STONE,
TILES, PAVERS, BRICK, CONCRETE AND GROUT

 **DRYTREAT**
Excellence in sealing products™

DRY-TREAT is the world leader in impregnating sealers.

META CRÈME™ is the next generation – an impregnating sealer which is technologically ahead of its time. META CRÈME™ is the ultimate in environmentally responsible protection for stone, tiles, bricks, paving, concrete and grout.

DRY-TREAT HAD 2 MAIN GOALS IN DEVELOPING META CRÈME™:

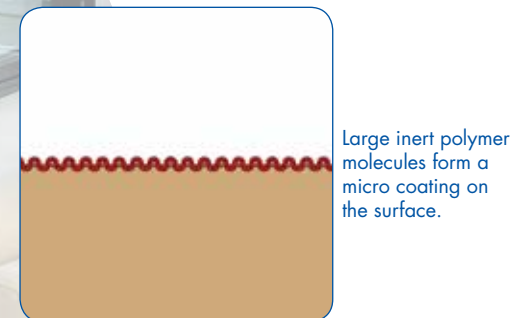

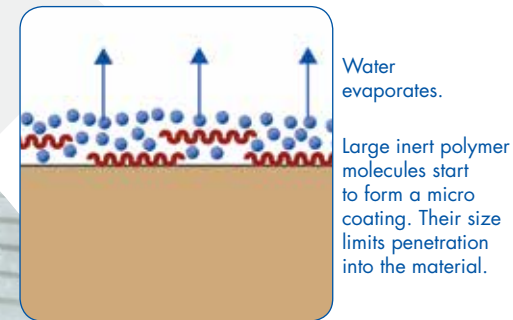

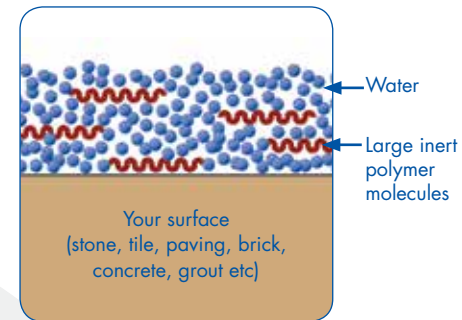

1. Performance, durability and protection which surpasses all others.
2. Environmental responsibility, not just by today's standards but tomorrow's.

Environmentally responsible

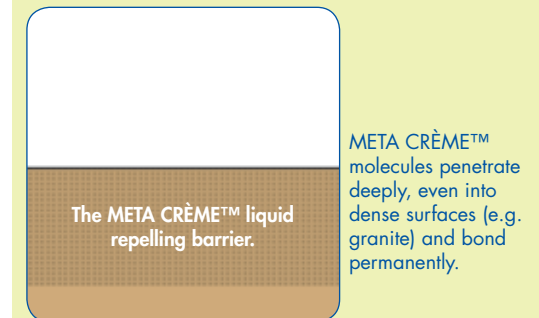

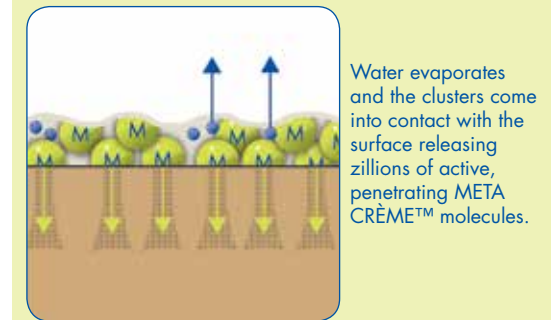

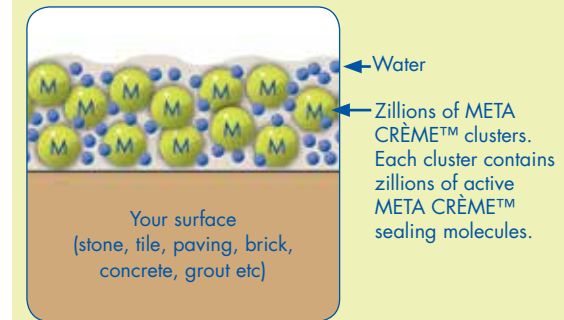

ultra low VOC sealer – meets LEED world best practice standards for environmentally sustainable construction. Makes cleaning easier so you use less cleaning chemicals. Award winning, waste and energy minimizing, recyclable packaging. See www.drytreat.com for details.

Common Impregnators

No permanent bonding, so sealer is worn away by traffic and cleaning, and must be regularly re-applied. Without a deep sealer barrier, water carrying harmful dirt and minerals can travel right up to the top surface and cause visible damage.

META CRÈME™

The deep, permanent META CRÈME™ barrier provides great stain protection, plus, by keeping water with dissolved impurities well away from the visible surface, you are protected against many other common types of unsightly damage (e.g. salt efflorescence, picture framing, spalling and freeze-thaw damage).
