

Chem-Set™ **PRODUCT NAME: TURF-SET™ 74**

SUGGESTED USES: Synthetic Turf

PRODUCT DESCRIPTION Turf-Set™ 74 Hot Melt is a pressure sensitive hot melt adhesive, low viscosity and high tack.

CHARACTERISTICS Synthetic Turf. Light color, low odor pressure sensitive adhesive. Excellent adhesion to polyethylene, polypropylene, and nonwoven substrates. Can be applied using either spray or extrusion equipment.

USES For Tape/Label, Synthetic Turf, and various packaging and assembly applications.

FEATURES

- Low viscosity
- Light yellow color
- High tack
- Pressure sensitive

TYPICAL PROPERTIES

Viscosity:	2,000 cps @ 350° F
Softening Point	195° F
Application Temp.:	300° - 350° F
Speed of Set:	Slow

ADDITIONAL DATA Type: Formulated hot melt adhesive compound
Color: Light yellow

LIMITATIONS Shelf Life: Twelve (12) months. Do not store at high temperatures. Keep container covered when not removing adhesive. Do not allow hot adhesive to contact skin. See SOS for details.
