Make connections in a Snap!

The **FAST-CON®** is the revolutionary, patented, stainless steel fastening system that allows you to quickly connect panels and other components together in a snap! The **FAST-CON®** clip system allows for a concealed mechanical fixing, making the union of two parts quick and reliable.

The **FAST-CON®** is made of 2 parts, male and female with a special profile suitable for a quick connection between them.

- **Male and female parts that snap together for fast assembly**
- **Made of flame-resistant and corrosion-resistant stainless steel**
- **Outperforms comparable plastic products**
- **Can be fixed using screws, rivets, bolts, or bonded with adhesive**
- **Holds approx 55 lbs in shear per clip once assembled.**

Installation is simple with 4 easy steps!

①

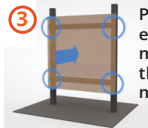

Fasten the female **FAST-CON® FC-01-FE.5_** on the structure by screwing, bonding or riveting

②

Insert the **FC-01-CE.50** centering device into the female clips

③

Position the panel and exert slight pressure to mark the location for the **FC-01-MA.5_** male part

④

Secure the male part **FC-01-MA.5_** at the markings

Kits Contains: • (4) Female 301 Stainless Steel FC-01-FE.53

• (4) Male 303 Stainless Steel FC-01-MA.50 • (8) Self-Tapping Screws VTB4.8X9.5.51

Advantages

- **QUICK AND EASY INSTALLATION**
- **FLAME RESISTANT**
- **CORROSION RESISTANT**
- **LONG SERVICE LIFE COMPARED TO OTHER PLASTIC SYSTEMS**
- **USABLE IN ANY SECTOR**
